This product has been tested and proven by a third-party accredited laboratory to effectively eliminate up to 99.9% of bacteria and viruses. This appliance provides 360° sterilization for any goods that you put inside it.

PRODUCT OVERVIEW**Content****Accessories****Dimensions****GETTING STARTED**

To get your station properly operating, make sure you use a QC 3.0 power adapter (not included) or a QC 2.0 power adapter (not included) to charge your device. Please note that using a different charger or power adapter with lower specification than mentioned above, may affect the performance of the device and may damage your device.

It is recommended to plug in your power adapter directly into a wall socket and not into extension cords or power strips. This will ensure that your device receives the best power operations.
